Additional Performance Credit Calculations and Supplemental Information

Describe below the progress made in meeting your program year work plan inspection goals. You must provide quantitative results for each compliance inspection and land application goal listed in your work plan.

The County conducted 9 compliance inspections and 2 construction inspections to meet the 7% inspection goal. Of the compliance inspections 5 were at sites without previous recorded inspections, 3 upon producer request and 1 with open lots that installed open lot runoff controls and filter strip for lot runoff treatment. One construction inspection of a poured concrete pit was performed prior to backfilling with a follow-up inspection after the pit floor columns were re-poured. In total 4 inspections were performed at sites 50-299 AU and the other 6 were at sites of 300 or more AU. All of the inspection were within TMDL areas of the County. Level 1 land application record reviews were conducted for the feedlots over 100 AU and all found to be compliant (3 were previously found to be lacking sufficient records).
